DataThon

"We are surrounded by data, but starved for insights."

MOTIVATION

- We have feedback for AIMS for IITH students, but as co-curricular activities are important part of students life, we do not have any feedback yet for different clubs of Gymkhana .

- Gymkhana people will get to know the performance status of different clubs and respond accordingly.

- Each clubs can have their performance records , and they can analyze what improvements it needs.

- In Gymkhana website, we can add , Performance of Clubs section. The IITH students can go through these data and decide which which club they should join.
